Problem Solving with JiJi

1) JiJi's Summer Race

JiJi ran a 2-mile race. There is cold water to drink every $\frac{1}{3}$ of a mile. If JiJi stops each time there is cold water to drink, how many times will JiJi stop?

2) JiJi's Costume Party

JiJi is making bow ties for a costume party. JiJi needs $\frac{1}{8}$ of a yard of silk for each bow tie. If JiJi has 2 yards of silk, how many bow ties can JiJi make.
